Trust Marshalls to make your project dreams a reality

Welcome to the **Marshalls Gardens and Driveways Showcase**, a curated selection of products chosen to help you create the outdoor space you've always dreamed of.

Why choose Marshalls?

At Marshalls, we've transformed outdoor spaces for over 130 years, combining experience with innovation. As the UK's market leader in garden and driveway products, we offer a wide range of options designed to suit every style and budget.

Our products are crafted from the highest-quality materials. Whether you choose **natural stone, concrete, or porcelain**, they provide timeless beauty and enduring strength, designed to complement your home. But quality doesn't stop with the materials you choose. The most successful outdoor projects are built on great products coupled with expert installation, and with our **Marshalls Accredited installers**, you get both. See page 9.

With Marshalls, you can be confident our commitment to sustainability, quality, and long-lasting performance supports all our products. To make the right choice for your home and lifestyle, we understand you'll need to know a little more about the material types available.

Natural stone

Natural stone carries its own unique character, making your outdoor space one of a kind. With its rich textures and tones, natural stone paving adds an undeniable elegance to create the space you'll love.

Get the detail:

Gardens page 12 | Driveways page 50

Concrete

Our concrete blends impressive durability with modern beauty. Crafted using precision engineering and innovative technologies, it resists wear while offering a versatile range of contemporary aesthetics.

Get the detail:

Gardens page 28 | Driveways page 56

Porcelain

Porcelain paving can transform your space into a sophisticated, high-end area you'll love. Popular for its contemporary look and low-maintenance properties, it remains effortlessly beautiful for years to come.

Get the detail:

Gardens page 36 | Driveways page 74

Helping you choose products with confidence

We know that choosing the right products for your project is a big decision. That's why this **Gardens and Driveway Showcase** includes several helpful tools to guide you every step of the way.

Clarity in budgeting

£££

You'll find a **clear price indicator** for each product, ranging from **£ good, ££ better, £££ best**, so you can consider options to suit your budget. The cost of your product is typically only 20% of your total project cost. See why 80% of your overall cost should be in the installation on page 9.

Trust accredited installers

Look out for projects completed by
Marshall's Accredited installers

We always aim to use our accredited members' projects for our product imagery, making sure you're not only inspired by the designs but also confident in the quality of the installation.

Visit our website

Scan the QR code, found alongside each product range, to be taken directly to our website. Here, you can explore our extensive product range, detailed technical specifications, and informative articles to help you make the best choice.

NEW Lunar® Textured, Silver Dust (page 66)

Even more tools to help you decide

End-to-end support

Search for a **Marshalls Accredited installer** near you via our website. They will guide you through your project from start to finish. See page 9.

Design your dream - in situ

Our **Outdoor Reality App** is perfect for visualising product options in real-time. It helps you measure, plan, and see how Marshalls products will look in your garden or driveway space. Plus, the app provides a cost guide, so you can manage the expectation of your project's final price.

Scan the QR code to find out how to download our app.

Lets get physical

Want to feel the quality of our materials? Head to our product pages on our website to use our **Sample Service** and request a physical sample to be delivered right to your door, so you can touch, feel, and compare in your own space before making a decision.

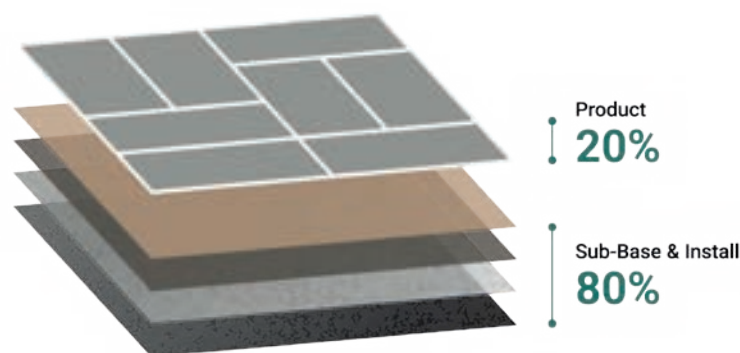

Look out for projects completed by
Marshall's Accredited installers

Quality installation matters

Finding the right installer can be just as challenging as choosing the right product. And with wildly different installation quotes out there, it's easy to feel lost. That's why, as part of this Gardens and Driveways Showcase, we've included details of how you can access and contact our trusted **Marshalls Accredited installers** – professionals carefully chosen for their expertise and annually assessed to ensure your installation meets our high standards.

Why 80% of your investment should be the installation

The success of your project depends 80% on installation and 20% on the product. Even the highest-quality materials can fail if not installed correctly. Poor groundwork, drainage, or preparation can lead to costly repairs, which is why investing in a skilled installer ensures your outdoor space remains beautiful and durable for years to come.

The Marshalls guarantee

By choosing a **Marshalls Accredited installer**, you're not only ensuring top-notch craftsmanship, but also securing our 10-year **Hard Landscape Guarantee**. This protects your investment against any product defects for 10 years after installation, giving you complete peace of mind.

What's your perfect
paving match?

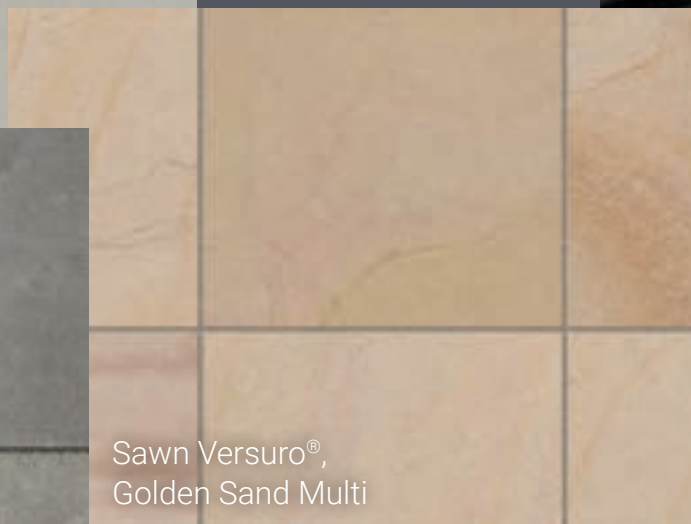

Unsure where to start? Let us guide you. Do you prefer the serenity of natural stone, the versatile beauty of concrete, or the modern appeal of porcelain? Whatever your style, our materials are designed to last, so your investment stands the test of time.

01 Natural stone

Towngate®, Grey Multi

Sawn Versuro®,
Golden Sand Multi

Sylvern®

Timeless by nature

Natural stone carries its own unique character, making your outdoor space one of a kind. With its rich textures and tones, natural stone paving adds an undeniable sense of elegance to create a garden you'll love.

Our sandstone ranges are also endorsed by the Marshalls Stone Standard, a list of guarantees we stand by that gives you complete confidence in the product you select from us. This means you're guaranteed the best-quality natural stone that surpasses standards for water absorption while resisting frost and delaminating.

Beyond its beauty, natural stone is designed to last. Even in UK weather, our superior stone endures, giving you confidence that your investment is protected, standing the test of time for all of life's special moments.

Beauty that endures

With rich textures, elegant finishes, and timeless appeal, our concrete paving makes it easy to create a garden that complements your personal style – transforming it into an outdoor space you'll be proud of.

Combining beautiful aesthetics with impressive durability, it offers the best of both worlds. To ensure utmost quality, most of our products are made in Britain, which also lowers their carbon footprint. Plus, our SurfaceMix® formula enhances resistance against weathering, stains, and wear, meaning it stays beautiful with minimal effort.

Whether you're hosting a summer barbecue or enjoying a quiet evening outdoors, you can count on Marshalls' concrete paving to provide a safe, reliable, and long-lasting foundation for life's special moments.

Luxury that lasts

Porcelain paving can transform your space into a sophisticated, high-end area you'll love. Popular for its contemporary look and low-maintenance properties, its durable design resists frost, stains, and is hardwearing, ensuring your garden remains beautiful year after year.

Beyond its good looks, porcelain offers practical benefits for everyday living as it retains less moisture and is more resistant to algae, moss, and staining than other paving materials. Our porcelain paving is easy to clean and meets British Standards for slip resistance, making it a safe choice for wet areas like pool surrounds or rainy climates.

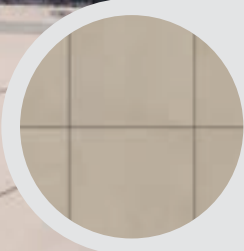

Whether you're hosting a gathering or simply relaxing outdoors, porcelain paving delivers the ideal balance of style, functionality, and lasting quality.

Timeless by nature

A driveway should do more than simply lead to your home – it should elevate it. That's why we've carefully selected the finest natural stone products, sourced globally for a long-lasting driveway you'll love.

Renowned for its organic charm, natural stone creates a sophisticated and stylish entrance that enhances the look of any home. With its unique textures and colours, every stone has a character of its own, adding kerb appeal that stands out from the crowd.

Not only beautiful, natural stone is also incredibly durable and designed to handle domestic vehicle traffic with ease. It resists frost, absorbs minimal water, and offers impressive strength, so you're reassured it stays looking great through all seasons.

Style meets strength

Your driveway is the first thing you see when you come home, so make it one you'll admire for a long time. Our concrete block paving combines style and strength, ensuring your driveway is not only aesthetically pleasing but also withstands wear, for beauty that lasts.

To provide you with the best quality, most of our products are Made in Britain. Our concrete is meticulously engineered and rigorously tested, ensuring maximum durability for your driveway. Plus, our SurfaceMix® technology enhances its resilience, reducing efflorescence and stains while providing superior resistance to weathering.

All of this means less maintenance for you, and more time enjoying a driveway that looks as good as the day it was installed.

09 Steps

Sawn Versuro®, Golden Sand Multi

Casarta® Slate, Silver Grey

Built to connect

Make every step count with thoughtfully designed garden steps to guide the way and connect different levels. With our steps, each piece is crafted to deliver the perfect balance of safety, durability and aesthetic appeal, helping to connect different areas of your garden.

Choose from a range of materials types, colours and textures to complement both modern and traditional settings.

Whether you're framing an entrance, navigating levels or creating a standout feature, each step is designed to integrate seamlessly with your paving choice.

10 Jointing

Built to bond

Finding the right jointing compound is the finishing touch that brings your entire project together. Designed to complement our paving ranges, our jointing compounds combine long-lasting performance with a refined, seamless finish.

Available in a selection of colours and textures, they help enhance the overall look of your outdoor space while providing durable, hardwearing protection between each paving unit.

Split pack Service

Not every project requires a full pack of products - for example if you're adding a border or making final touches. Our split pack service allows stockists and installers to order smaller quantities for most of our product portfolio. A premium however, does apply, so adjusting to a full pack may be more cost-effective, especially if you are planning future extensions. For further details, contact the Marshalls sales team or your local stockist.

Important General Technical Information

Efflorescence in concrete products

Efflorescence is a temporary and naturally occurring phenomenon associated with Ordinary Portland Cement (OPC), commonly used in the manufacture of concrete products. It manifests as white patches or a general lightening of the concrete surface, often mistaken for fading or discolouration. In most cases, natural weathering, such as rain and wind exposure is sufficient to gradually remove efflorescence from the surface. As such, it is advisable to allow an initial period of weathering before evaluating the final appearance of the product. As efflorescence is outside of manufacturer's control, responsibility for its occurrence cannot be accepted.

Maintenance

Paving materials require periodic cleaning to maintain their appearance. Regular sweeping to prevent the build-up of detritus which can detract from the surface's look and contribute to wear over time is recommended. Light coloured blocks will naturally emphasise muddy footprints, general stains, such as tyre marks and oil spills on a driveway. As a result, these surfaces will typically require more frequent maintenance to preserve their overall appearance.

Proprietary cleaning agents are widely available. However, care should be taken when buying cleaning agents as some varieties contain a concentration of acid, which can adversely affect the appearance of concrete and natural stone products. A trial on a small section of paving is always recommended prior to using it on the full area.

For more information or tips, please visit our website and download our Marshalls Cleaning & Maintenance Guide.

Colour variation

The colours shown in this literature are as accurate as photographic and printing processes allow. However, we strongly recommend that final colour choices be made using actual product samples, which can be requested via our website.

Batch variation

Concrete products

Marshalls concrete products are manufactured using naturally occurring raw materials. As a result, slight variations in colour and appearance may occur between batches, even when the same product is used. Despite employing high-quality materials, advanced manufacturing processes, and stringent quality control, batch-to-batch variation is a natural occurrence. Although typically minor, these differences may be noticeable if products from separate batches are installed side by side. To reduce the risk of visible variation, we strongly recommend checking batch codes before installation and ensuring that all packs used in a continuous area come from the same production batch.

Natural stone products

Natural stone products inherently display variation in colour, texture, and surface markings due to their geological origin. These characteristics are part of the stone's appeal and should be expected. Iron spots can sometimes be identified, after installation. This is due to oxidation of iron materials within the matrix of the stone. This does not affect the structural integrity of the stone.

Additionally, for best results on site, products should be thoroughly mixed during installation by drawing from at least three different packs simultaneously.

Porcelain products

During porcelain tile production, colour variation can occur. To maintain consistency, Marshalls sources only first-choice tiles, selected from a narrower colour spectrum to ensure uniformity across each range.

We aim to dispatch all porcelain orders from the same batch, with the batch code clearly printed on each pack (usually denoted by a letter followed by a number). Please confirm all packs share the same batch code prior to installation. For porcelain ranges available in multiple sizes, we do not recommend mixing sizes, even when batch codes match, as products may be manufactured at different sites.

If you have any concerns or require clarification, please contact our Group Technical Services team.
